## **BOOK SYNOPSIS**

Shortly after the Russians launched Sputnik in 1957, Hannah Arendt quipped that "only in America could a crisis in education actually become a factor in politics." The Cold War battle for the American school - dramatized but not initiated by Sputnik - proved Arendt correct. The schools served as a battleground in the ideological conflicts of the 1950s. Beginning with the genealogy of progressive education, and ending with the formation of New Left and New Right thought, Education and the Cold War offers a fresh perspective on the postwar transformation in U.S. political culture by way of an examination of the educational history of that era.
