BOOK SYNOPSIS

Corporations are spying on you more than government spies ever could. Just follow the money to find out how and why. Corporations can often predict what you will do next, detect subtle changes in your mood, and essentially know what you're thinking about. Development of behavioral biometrics accelerated after 9/11. Some of the research and development was funded by the government to identify potential terrorists and protect the public. However, these technologies are now used by corporations to trample your privacy, practically read your mind, and manipulate you to enhance their profits. Verify the facts yourself. This book contains over two hundred references, including court documents, patents, official government documents, and many other sources. You can do many things to protect yourself. With your help, this book can do for Internet privacy what Ralph Nader's Unsafe at Any Speed did for automobile safety.
